

Features, Enhancements and Bug Fixes in the ResourceMate 4.1.17.0 build

Version Build Date: June 27, 2024

Version Release Date: June 28, 2024

NB: 4.1.17.0 is a maintenance release only.

Features:

- Web OPAC Synchronizations would sometimes stop, especially at sites that involved multiple ResourceMate Clients. This entire process has been completely rewritten and using new logic to process this.
- Automatic Backups and Offsite Storage - Offsite Storage scheduled jobs would not be carried out due to an error.

Bug Fixes

- For those customers who are using the **Jaywil Supplied Parameters** in the **Utilities > Preferences > Email** Settings form, Mail Out Reminders and other emails would not be sent due to a change made by our SMTP Server provider.
